Beatrice 77 Livestock
Beatrice, Nebraska

Sunday, February 1st

The Trauernicht Families would like to invite you on Feb. 1st!

Welcome to our 40th Annual Production Sale!

**SELLING 82 PERFORMANCE
TESTED BULLS
45 years in the business!**

"Quality is bred on...not fed on."

Darrin Minge, Livestock Specialist • 785-747-7422

Congratulations to the entire LHT Crew on this 40th Annual Production Sale. Not only is it an exciting time in the beef business but an exciting time for LHT genetics. The Trauernicht family continues to make great advances in their genetics that are so profitable for their customers and their dedication to their customers is second to none. It has been a pleasure for us to watch this program grow as well as watching the next generation grow up to know the LHT program will be alive and thriving for many years to come. Join us on Super Bowl Sunday for the 40th Annual LHT Production Sale and help celebrate with the Trauernicht family!

 **Eberspacher Enterprises Inc.**

Another year has passed - they seem to just speed up! When I first started working with Dr. Melvin Pettit raising Simmentals, I never thought that 45 years later all my dreams would come true! I couldn't imagine that I would have assembled my own cow herd and raise enough bulls to have my own sale! It has been a roller coaster ride, but seeing where we have come from and then going out and walking through our bulls 45 years later, it tells me that all those years of hard work and dedication were well worth it! This year's 40th annual bull sale offering continues to fit the mold we strive for... "Performance Cattle with a Touch of Style," and to top it off, check out their numbers!

We feel very strongly that our bulls are perfect for today's industry. We strive to have high performing cattle that still maintain adequate calving ease. Another main focus at Trauernicht Simmentals is high fertility and maternal cattle. I know not every one of you keep your own heifers, but if you do, feel confident that they will work well.

As always, we strive to be very service-oriented and would be more than happy to assist you with marketing your calves and LHT Brand slaughter bulls. We continue to get calls back from several of the first LHT sired heifers - people just can't believe the quality of cows they are making and they want more! With the high calf prices, it has been a challenge to find enough LHT Brand sired calves to fill the orders I have. Please don't hesitate to call me if we can help you market your calves, as there is a demand for them.

Darrin Minge continues to work as our LHT Brand Livestock Specialist. Going into his 4th year at Trauernicht Simmentals, he is truly committed to our program. We couldn't do it without him! He has been a huge asset to our operation. He has steadily improved our conception rates through his dedication to heat detection and proper nutrition programs. Additionally, he continues to look for way to improve efficiency by having the whole cow herd calve much tighter and get more AI calves every year. Feel free to contact Darrin, in addition to Scott and Loren, as he knows the cattle as well as anybody. He is also a great person to talk to if you would like some ideas on trying to improve the reproduction in your herds.

We at Trauernicht Simmentals owe a special tribute to all the friends and neighbors who help make our annual production sale possible. Without you, we wouldn't be able to make this sale happen! Thanks for all the countless hours and the behind the scenes work that each and every one of you do. Since some of you have never seen a sale from the front, you wouldn't know that it looks like I have a professional crew! We are truly blessed - you are the best crew!

Last, but certainly not least, we want to thank you, our loyal customer. With your overwhelming acceptance of our Simmental and SimAngus bulls we are able to have remarkable success in raising seed stock! Never have our bulls been in such demand, and consistently to sell out early year after year! Your success stories have brought us great joy and continue to motivate us to continue on! You are truly appreciated.

**Sincerest Thanks!
LT & Scott**

Trauernicht Simmentals PRODUCTION SALE 2015

40th Annual Sale held on Sunday, February 2nd at 12:00 Noon Sharp!

Sale Location: Beatrice 77 Livestock, Beatrice, Nebraska

Twins. When you see this pair of twins, you will be impressed! They are big middled, huge topped, with an impressive rear quarter. Top that off with the fact they are royally bred - Wow! Their dam "Star" did a fair amount of winning for the girls and so did Star's sibs! Basically I guess what I'm saying is they will work no matter which facet of the cattle industry your operation is focused toward.

 16A is a solid black bull that is very well made sired by Steel Force. His dam, Miss Jesse is one of our donors and comes from the very successful Zeis Maxine A231/Zeis Miss Jesse G177 cow family, which has produced some great cows. He should make some very eye appealing females.

Here is a bull with power and style, he is big framed and big boned. He will add pounds to your calf crop and make stout replacement females that will retain in your herd for generations. Both dam and sire are deceased so these rare genetics won't come back around again. Don't let this opportunity pass you by!

What a bull! When we first purchased this bull's granddam, we had a goal in mind - to produce stout made, big middled bulls that calve easy and are structurally sound. This bull puts that all together, and has an awesome set of numbers to go with it! He is an outcross for a purebred as you can come up with. Then to top it all off, check out his numbers - top 5% of the breed on API and top 3% TI!! He ratioed 111 at weaning and carried it on up at yearling to ratio 115! Bulls like this are truly hard to find!

Pounds, Pounds, Pounds = \$\$\$...that is the only equation you need to know when it comes to this bull! Check out his weaning weight and yearling weight EPD's...top 1% of the breed in both, and still adequate for calving ease. This is one heck of a good bull! If you are in the market for a red purebred, I will bet you won't find a better red bull this year to make excellent feeder calves out of!

What a pair of Broker bulls here! They are out of one of the most famous Angus cows we have had the privilege to work with. Their maternal brothers have been highlights of past sales and have had great success for their new owners. To top it off, the flush mates to these two bulls were highlights in our Nebraska Platinum Standard sale this fall, and one sister was reserve calf in a very competitive division at the 2014 Iowa State Fair. These bulls are very big bodied, structurally correct bulls with a very neat made front third. If you want feeder calves with doability and extra style to earn you that top dollar, make sure to check out these two bulls.

Twin. 04B has been one of our favorites since birth. His dam has produced a good one every year. Two years ago 04B's full sibling was one of the high selling bulls on LHT bull sale. Black Diamond has lots of capacity, volume, good structure, a big square hip and on top of that has a great

disposition. His API and TI EPDS are in the top 10% of the breed. It is hard to find a bull with this type of eye appeal and have the numbers that 04B has, make sure to take a look sale day.

Every year we have to try something a little different. We tried Irish Whiskey off a recommendation of Rick Buehler. He promised us he would be a winner on our 36R donor. Well, we gave it a whirl and was he right!! We got a tremendous set out of that mating. The two heifers sold right at the top of the

"Easy to Look At" online sale. If you are looking to play in the club calf business or just want some extra look in your calf crop, make sure you check this guy out! Keep in mind...direct sons of Whiskey are getting hard to find. Don't let this one pass you by!

When we sold this bull's sire, Herbie, 2 years ago we were very excited to try him and see how he was going to work. Well you can see by this bull that Herbie did everything we wanted him to do! The best part? This calf is a baldy! Expect him to make some excellent feeder calves with that "wow" factor that feeder calf buyers are looking for.

We bred this bull's mother to Upgrade three years in a row just to get this bull! We got two tremendous heifers in the process - one topped our breds last year and went home with Nick Sloup. This bull has looks and numbers to boot! 8 EPDs in the top 15% of the breed

to be exact! He boasts top 2% in Yearling Weight and Terminal Index while remaining easy calving and possessing a maternal weaning weight EPD in the top 4% of the breed. This is a rare combination! Don't overlook this one!

You keep hearing/reading about numbers, style, and performance. We know that most feeder calves are bought by the way they look and most bulls are bought off of their numbers and looks. Well it's your lucky day, because this bull has both! He has 7 traits in the top 3% of the breed. He topped the charts in his contemporary group at weaning time by boasting a ratio of 117. To top it off, he has some very good looks!

These are some of the younger bulls in the sale, but they are doing everything right or they wouldn't be here! Don't let their age fool you. Look at their dam's proven track record, with all their maternal sibs turning out to be sale toppers here.

These bulls have all the right parts to be great ones. They are big boned, stout hipped and huge bellied while still having some very good calving ease.

If you are wanting a trio of bulls that will calve easy, post big weaning weights, and have some big rear quarters, tops and are huge ribbed, don't overlook these boys! Turn 'em out with confidence! They are all three full sib embryo bulls. Check out their EPDs - they are at the top for growth and calving ease. Don't let their size bother you compared to the other bulls that are 2-3 months older.

Guest Breeder: State Line Farm Simmentals

08B is a late March black baldy bull that will grab your eye. Commodore's dam, Miss Cheyenne is a full sibling to KSU Venom, the 2005 Denver Grand Champion Bull. Miss Cheyenne's dam, Miss Kansas K11G is a very popular and proven cow, which has produced many high selling progeny in her lifetime. 11g was listed second on the list of most Prolific Donor Cows in Register with 226 progeny. Commodore is a stout made, sound bull and has a stout middle. Being backed by a great cow family should only add to his appeal.

This bull just keeps getting better as he gets older! He has been a favorite of mine since he was a calf. If you want a bull to add some style and pounds to your calf crop, look towards this bull to do it. Remember hybrid vigor is free, use these purebred bulls on your straight bred cows to make those highly sought after F1's.

Here is a bull that we held over last spring so we could have a tremendous aged bull! You can't make one read much better on paper, as he is a heifer bull that ranks in the top 3% in the breed for direct calving ease and still ranks in the top 1% of the breed for weaning weight, TI, and API!!! Not many bulls can do that!

Bull Buyers Guide

Explanation of How to Utilize API and TI Indexes

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described to the left, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a \$50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more information, visit www.simmental.org.

Definitions of Terms

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW):

Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

I would first of all like to say **THANK YOU!** We appreciate your interest in **LHT Brand Cattle!** It is with extreme excitement and gratitude that I invite you to our 40th annual Bull sale. The customers have spoken! We at Trauernicht Simmentals are doing our part to move forward according to customer demand. We know you are inundated with ads that that boast the best set of bulls or females ever raised.....well I'm not going to say a word, I will let you decide! We continue to move forward in what we feel are cattle that are right for the times. With that being said, we assure you that we are committed to following the Trauernicht Tradition. Our program offers to you "Performance Cattle with a Touch of Style" along with "Quality That is Bred on, Not Fed On." We believe in these mottos and build our program around them with every decision we make. Some breeders are strictly numbers and some are strictly looks. We strive to be a combination of both. We believe too much of a good thing is not a good thing. Our belief is that you have to consider more than one trait and select for functional cattle. That is where we say bred on not fed on! We want easy fleshing, highly fertile, performance cattle that calve easy and still have some look to them! Trust me, that is not easy to breed for, but that is our Program and Tradition!

As always we offer a sight unseen program and will guarantee every purchase is exactly as stated to you or your money back. This program continues to grow every year and we will sell approximately half our bulls this way again this year. We will have complete Performance data, Ultrasound data, and Breeding exam data available for you the week of the sale. Once again please don't hesitate to contact me or Scott to help assist you in any way that we can.

On bulls that sell for more than \$3000, we will split the feed costs with you. Anything under \$3000 will be the responsibility of the new buyer. Once again, we would be happy to take the bulls home and care for them until April 1, but would highly encourage you to take out insurance on them for this amount of time.

Back by popular demand! We put together a scale from 1-10 on the traits that we feel are most important to our customers based on our most frequently asked questions. These ratings will take the place of writing individual comments on each and every bull.

	1	5	10
Terminal Cross (TC) <i>Bulls that are meant for customers that want to feed out their cattle.</i>	Should find another choice	Will work fine but there are probably better choices	As good as it gets to produce efficient feeder cattle
Maternal (M) <i>Bulls that you would want to keep daughters out of. We consider their dam's udder formation, calving interval, the maternal milk EPD and the average times a cow is bred before conception.</i>	Not suitable	Would be okay but could find better	Would make ideal cows
Calving Ease (CE) <i>Self Explanatory</i>	Use only on old cows and still expect some difficulty	Use on any cow and some heifers with caution	Use on heifers with confidence
Disposition (DS) <i>Self Explanatory</i>	Nervous in the pen and stays clear to the other end	Will get nervous when strangers enter pen, relaxed when in familiar environment	Takes extreme measures to get excitable

KEY
EPD Table

CE • Calving Ease

BW • Birth Weight

WW • Weaning Weight

YW • Yearling Weight

MCE • Maternal Calving Ease

MM • Maternal Milk

MWW • Maternal Wean Wt.

API • All Purpose Index

TI • Terminal Index
