**At the Farm • Emerald, Wisconsin**

# The Courtney Family

Peter was raised on an Iowa farm and though his business endeavors through the years have taken him into the heart of all the major U.S. cities, his heart never left the farm. Then, in 1975, starting out as a hobby—a couple of Simmentals and a vision—and suddenly we were all swept into the Simmental world.

Queen ready to take on the breed. And, nothing thrilled him more than seeing a youngster leading a Triple C heifer into a show ring.

# The Rogers Family

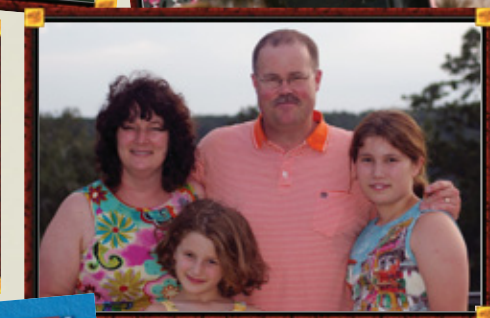

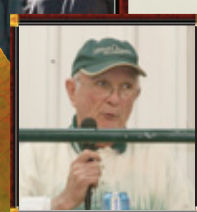

Take care in your travels and we look forward to seeing you at the sale.

# The Triple C Family

It is with great sorrow that we need to write this letter. With Peter's passing our goals and missions have obviously changed. Peter, Sam, and I always worked well together as we all agreed the cow makes the difference. The program here at Triple C has a rooted history of strong cow families that has made our program's strength what it is today. Mixing that with our belief in strong herd sires makes the depth and quality the standard by which to compare.

The donors of Triple C are young and proven. Their genetic values will stack against any in the breed. From calving ease to carcass traits, they are unbeatable as a whole. The herd sires of Triple C are trait leaders with high API's and TI's. Peter believed these bulls needed to work, so every year they serviced cows naturally.

The main cowherd is outstanding with a lot of sisters or offspring to the greatest cows in our breed. Most of the embryo recipis are registered cows. We believed in putting one embryo in them and then they needed to be high enough quality to have their own calf. The bred heifers are phenomenal. The open heifers are our future. These youngsters simply are impressive. The bull calves are the best class yet. If some of these boys don't make it to the semen studs something is wrong!

With the partners involved and the genetics assembled, Triple C's mission was simple: producing cattle that can actually be measured both genetically and profitably. Peter always believed in supporting our fellow breeders. He was a strong supporter of our youth's involvement. When Peter was missing in action you could always find him with the kids somewhere. His scholarship program will continue to be in effect.

Peter was very proud of our program. His drive to be active and successful has been one of the great learning lessons in life for us. Our kids will benefit from him in realizing you must set your goals high and always work hard toward them. "Never sit down."

From Peter the knowledge we have gained will remain with us and will be part of our future. His love for so many and willingness to help our industry will be long remembered. When Peter hired us he told us, "I want only the best and to be the top in our industry". Together we feel we have achieved that goal and are very proud to present to you our total offering.

Serviced by all major airlines (55 miles from the farm)

**Eau Claire, Wisconsin**

Serviced by Northwest Airlines (55 miles from the farm)

**New Richmond, Wisconsin**

Can accommodate private planes (13 miles from the farm)

**SALE TERMS:** All sales are final. Terms of this sale are cash or check, payable upon the conclusion of the sale and before animals will be moved. Sellers will reserve the right to require a certified check as settlement before releasing any cattle. Any questions can be directed to Eberspacher Ent., ph. 507-532-6694 or 612-805-7405.

**INSURANCE OR PURCHASES AND RISK:** All animals are at owner's risk prior to the sale and become property of the purchaser as soon as declared sold by auctioneer. A representative from American Livestock Insurance will be available sale day, Jame Secondino 765-832-2697.

**BIDDING:** All animals sell to the highest bidder. Any disputes or challenges regarding bids will be settled by the auctioneer. His decision is final.

**HEALTH:** All animals will be accompanied by proper health certificates making them eligible for interstate shipment.

**EPDs:** EPDs in the catalog are the new Fall 2009 EPDs. Please note that EPDs may change from the time the sale catalog is printed until registration papers are transferred.

**ANNOUNCEMENTS:** Announcements made sale day and from the auction block during the sale take precedence over printed material in this catalog and other announcements.

**LIABILITIES:** All persons who attend this sale do so at their own risk and the sale management or owners assume no liabilities for any accidents that may occur. The owners, auctioneers and sale manager assume no liability for injury or death that may occur following the sale of such livestock. All animals selling as registered lots have been registered and have complied with the guidelines of the American Simmental and Angus Associations. The information provided in this catalog is accurate to the very best of our knowledge.

## Live Internet Bidding @ [www.edjecast.com](http://www.edjecast.com)

Real time bidding will be available via the Internet for this sale. Live video /audio will allow buyers to bid on animals as if they were present at the auction. Internet buyers must create an account and register to bid 24 hours prior to the sale at [www.edjecast.com](http://www.edjecast.com). Instructions are available on the website or by calling Stephen Linnebur at 303-549-6557 or Jen at the EDJE Cast office, ph. 866-839-3353. No buyer premium added to the purchase price.  
*A division of EDJE Technologies, Inc.*

# Peter Courtney lived his life like no other... he was a true visionary in every sense of the word.

It is impossible to count the lives that this one man has touched. Peter believed that if you wish others to believe in you, you must first convince them that you believe in them. Peter did believe in people and helped an astronomical amount of them achieve things that few thought possible or believed was within their reach.

He challenged everyone and demanded perfection. He worked hard every day to make all of us better at what we do, believing that people begin to become successful the minute they decide to be and rarely did Peter lose an argument. His contribution to this breed is beyond comparison with special benefits to the AJSA members. Ila always said, "If you can't find Peter look for the kids, he will be there!"

Peter's vision for people was simply to help them achieve their goals and to support them through good times and as well as rough spots in the road of life. Any of you that knew Peter very well know that you never did anything with Peter without a plan. It is said the 'failures don't plan to fail: they fail to plan' and Peter was staunch on making you step up to a plan to ensure success. The minute that Peter was called to the beautiful pastures of heaven, the new plan was set forth to bring you this extraordinary event.

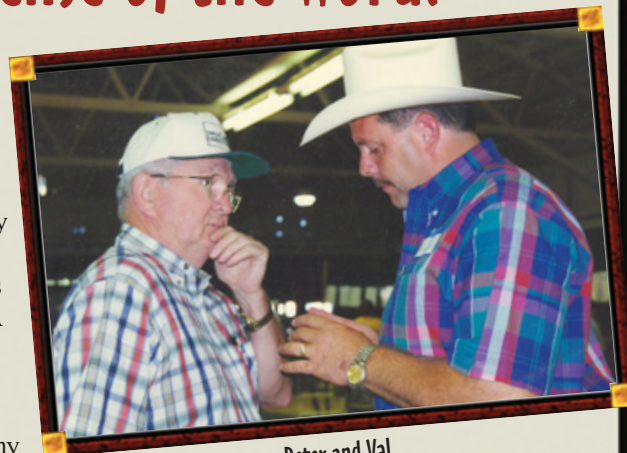

What an opportunity to be able to come in and harvest the years of breeding great ones. It will be exciting for all of us that have been part of the marketing team for Triple C Farms to see how these genetics will develop and mark their spots in the history book of the Simmental breed and the entire beef industry. The offering now assembled is simply stellar.

Please accept this as your personal invitation to join the Courtney and Allen families along with all of us for what will no doubt be a history-making event for the Simmental breed. Come early as we share memories of Peter and his historic life as our Simmental hero... yes, it is an opportunity of a lifetime!

Sincerely,

*Val & Lori Eberspacher*

## The Triple C Scholarship Program

Animals must be purchased from Triple C Farms at public auction or by private treaty. The heifers must be bought and registered by a Junior and be in his/her name.

If the animal that wins in 2009-2010 is the first animal purchased from Triple C Farms by the Junior, the scholarship listed under 2009-10 will be paid. If, at the time of the award, the Junior has purchased two or more animals from Triple C Farms, the scholarship listed under Multi-Purchase will be paid.

The scholarship is paid for each of the awards received. If a heifer achieves applicable awards in two or three of the approved shows, the Junior will receive scholarship money for each win. If the heifer repeats the achievement the following year, the scholarship is paid again.

To receive the scholarship earned, the student is required to submit the proper information on a Triple C Farms Scholarship Application Form, provide proof of winning and provide a picture of the winning animal on show day. Scholarships will be applied to the Trust account approximately 10 days after receiving all materials. Application forms can be requested in writing from the Triple C Scholarship Program, **Dr. Steve Rogers, Scholarship Administrator, 9890 Moss Road, Fall Creek, WI 54742 or by phone 715-832-7867.**

Scholarships will be funded by Triple C Farms and placed in the Triple C Scholarship fund in Trust at Wells Fargo Bank in the name of the recipient. The fund administrator is Dr. Steve Rogers of Triple C Farms. The fund will earn market-rate interest until properly distributed to the accredited two or four-year college, university or vocational-technical school. Wells Fargo Bank will process scholarship awards in August and December. Checks will be made payable jointly to the recipient and the educational institutions and must be endorsed by both.

Qualified expenses include tuition, books, related fees, room and board. Scholarships can only be used by the winning Junior and are nontransferable. Any unused funds will be forfeited on the scholarship holder's 28th birthday.

Scholarships to be awarded	2009-10	Multi-Purchase
<b>National AJSA Show</b>		
Grand Champion (Purebred Show)	\$10,000	\$12,500

Grand Champion	\$250	\$250

# Hollywood Queen Cow Family

Singlehandedly, Hart Hollywood Queen put Triple C Farms on the map. According to ASA records, Queen is the most prolific donor in the breed, having over 227 progeny now registered, and she is not even close to being done! Queen has been flushed to Simmental, Angus and Club Calf bulls and simply just does not miss. Her progeny have surpassed \$1 million dollars in revenue. They are far too numerous to start listing and are scattered from coast to coast. From her daughters being donors and her sons being A.I. sires, no other cow has ever had such an impact on her respective breed. At the age of 14, Queen is still as sound as a cat. If you can't afford her on sale day, be sure to think hard about

purchasing one of her many offspring that are also part of this historic dispersal. Queen was always Peter's favorite. Every time he came out to the farm, she was the one he had to see. He always said she deserved to die at Triple C Farms, but little did we know that she would outlast him. There is a genetic cell line that has been drawn on Queen if anyone is interested in cloning her. **Sells open and ready to flush.**

Diamonds and Radiant are two of my favorite heifers in terms of making awesome cows. They are soft structured, high volumed, big topped girls who possess that elegance and balance that sets them apart. They are full sibs to our Triple C Ultimate Force red bull that has done such a good job for us. With a cow like Queen as their dam, you are guaranteed high production and longevity.

Queen Elizabeth "Lizzy" is possibly the best heifer Triple C has ever raised. When making the flushing decision on Hollywood Queen, Peter saw the greatness in Echo, so we flushed her to him and obviously, it was a wise decision. Hollywood Queen is the #1 prolific donor in the Simmental breed. She has 227 calves registered to date and is far from done.

Since March 2007, Queen has averaged 12.8 embryos per collection. Our plan was to keep Lizzy to help replace Queen. Can you imagine breeding purebred Simmental bulls to Lizzy and getting purebred calves of this caliber? Lizzy is tremendously thick, super sound and is cleaner fronted than a show lamb. She is big and square hiped, deep bodied and hairy. When looking at her, all you see is elegance and greatness. You can't go wrong with this opportunity – she could be the future premier donor of the Simmental breed!

Pasture Dates: 5-15 to 8-20-09

Nan is one of the few Queen x 600U cows here. She is long skeletoned with a nice front end. She is typical of the Queens being moderate in her makeup and wide at her base. Nan does a nice job transmitting style and eye appeal to her offspring.

# Crazy Queen Cow Family

Crazy Queen is Hollywood Queen's most powerful daughter to date. She is wide topped, square hipped, clean shouldered and fancy fronted. She is flawless in her structure and design. We own Crazy Queen with Rolling Hills Farm, AR. Her best contribution is her ability to produce large numbers of embryos with a high conception rate. Over her lifetime, Crazy Queen has averaged 24 embryos per flush. Her ability to produce good cattle no matter what sire she is flushed to is amazing. From Simmental to Angus to Club Calf—they all simply work. Her calves have topped sales including our Millennium and Bullennium as well as the Lone Star Review, and her progeny will continue to do so. Her genetics are as predictable as the

sun rising each morning. If you need a fault free, easy keeping donor cow that will simply make you money, then Crazy Queen if for you. **Owned by Triple C and Rolling Hills Farm.**

**Owned by Triple C and Rolling Hills Farm.** Kiss Me Now and Kiss Me Quick have sure generated a lot of interest here at Triple C Farms this summer. We own the Crazy Queen cow with Rolling Hills Farm, AR. They wanted to do something a little different and boy did it work well. To have purebred Simmental heifers that are shaped like these two with that "show me" attitude and killer look is impressive. I do not know which one of these is the better, but the second best one is really good.

Only in a dispersal will you find genetics like this. Years and years of planned matings go into these young cows. When you have daughters and granddaughters of the best cows our breed has to offer, it is very gratifying. T2242 is just that. She is moderate framed, easy fleshing, perfect uddered and most importantly, profitable. Her bull calf by Singletary is one of the best.

# Go Girl Cow Family

Go Girl is one of the most popular Simmental cows our breed has ever known. Her progeny of greats is far too many to list. This cow is simply phenomenal from her outstanding phenotype, being sleek fronted, moderate framed, long spined and most importantly, being prolific. Check out her genetic values – they are outstanding. Every trait with the exception of two are in the top 10% of our breed, with some carcass traits being in the top 1 or 2%. Also, look at the accuracies that support this data – simply impressive, then look at her production record. She averages 15 embryos per collection. When you combine all of these amazing attributes, it helps you understand why I think the homozygous black and homozygous polled Go Girl is

one of the best cows our breed has ever seen. Only in a dispersal could you purchase a cow such as this in her entirety. She last calved in April of 2008 and will calve again Feb. 1, 2010.

Gossip Girl and Show N Tell are very similar in type and kind. They are moderate framed, thick designed, wide based, compact heifers that are easy fleshing and nice fronted. Check out their EPDs – they are well balanced with high REA scores. We chose to mate both of these heifers to TCF/RHF Energizer and our thought was the cross of the Go Girl family with the Crazy Queen family would be spectacular.

Good Girl, another Power Drive x Go Girl, is moderate framed, easy fleshing, massive middled and excellent uddered (just like all of them). She is big hipped and attractive designed. I think mated to Dreamworks, her calf could be tremendous.

Go Go is a full sister to Fashion, the donor cow we own with Rolling Hills Farm, AR. She was to be our consignment to the Minnesota State Sale this year, but she had the misfortune of losing her calf, so we still have her. Go Go is elegantly designed, being fancy fronted and well muscled. She is fluid in her movement and has nice genetic values. She sells bred to Singletary.

# Pashion Cow Family

We are serious when we talk cow families at Triple C Farms. Pashion is explosive – it runs four generations deep here. It takes hours of planning and days of thought year after year to produce the great ones. It sure is gratifying when you come up with an individual as unique as Pashion. Study her genetic values – from her combination of CE, BW, Milk and MWW all being in the top 5% of the breed to her carcass traits of MARB and REA above the top 1% and her API and TI being off the charts simply puts her in a league of her own. Combine all of these genetic traits with a phenotype that is long sided, moderate framed, easy fleshing and attractive fronted and it is simple – you

have got something really special here. In transplant, this youngster produced 13 #1 eggs 60 days after calving and will be flushed again before October 3. Triple C Farms owns Pashion with Rolling Hills Farm in Arkansas and have decided to offer her in her entirety. This homozygous polled and homozygous black young breed-changing female is capable of putting some progressive breeder on the map for a long time. **Sells open and ready to flush.**

Genetic Opportunity of a Lifetime - The Complete Disposal of Triple C Farms

# Miss Liberty Cow Family

Liberty is simply impressive no matter what angle you view her at. She is massive middled and long skeletoned plus is wide based and thick muscled throughout with a level top and a big hip. Structurally she is athletic; she flexes where she should and stands on big bone and excellent feed. To watch this soft middled, feminine fronted cow move about the pasture is simply a pleasure. One of her sons, Agility, was our lead bull in our 2009 Champion Pen in Denver. He is now at Hart Farms (SD). Another Pen bull this year was Achiever. He was second high seller our Bullenium Sale, going to Lawrence Franzen (NE). A heifer mate to these bulls was a high seller in the 2008 Millennium Sale to

Black Dbl. Polled PB Bull ASA#2487853  
Tattoo: W55M BD: 1-2-09 Adj. BW: 90 ET  
Adj. WW: 888

Janssen Farms got a steal when they purchased Libby in our Millennium Sale last fall. The Libby offspring simply out perform their contemporaries. Impact is extra long sided and free moving. He was born at 90 lbs. and adjusted to 888 lbs. at weaning - that's getting 'er done!

Lot 44A

Personality is one of my all-time favorite two year olds here at Triple C. Being a full sister to Miss Liberty and possessing the pedigree she has automatically puts her at the top. Then when you analyze her amazing body conformation combined with her genetic values, you realize just how good she really is. She is long and deep bodied with a clean, slick front. Combine this with her muscle shape, structural correctness and perfect udder makes Personality one unique individual. She sells bred to our amazing new junior her sire, Dreamworks.

# Josie Cow Family

Josie has rapidly become one of our most sought-after cows. From her outcross pedigree to her amazing ability to produce good functional cattle no matter how she is mated. Just to list a few, her three sons we called "The Boys": Singletary, high-selling bull in Denver to Remington Cattle Co. (CAN); Bettis, a private treaty bull to Sanders, Cooper and Rew Ranch (KS) that is now at Accelerated Genetics; and L. Taylor, high selling bull in our Bullennium Sale to Clearview Farms (IL). Their littermate sister is now a donor for Sunset View (KY) and Sanders Ranch (KS). Another littermate is a donor for Helen Sill (MI). Yet another Bullennium high seller this year was Paragon, who sold to Bill Sachs (MO). And let's not forget her litter of Power Drives that were simply impressive. Her calves this year by Ultimate Force are certainly fancy. She never misses in transplant. Josie calved this

January to EXAR New Look and will sell open and ready to flush.

# No Doubt Cow Family

Powerful, yet elegant best describes this homozygous polled and homozygous black Power Drive daughter. Her side profile is simply stunning. She is a loose hided, explosively middled cow with a tremendous amount of internal dimension and base width. To have this much mass and yet still maintain eye appeal doesn't happen often. Her best contribution is her athletic and fluid motion. Her angles are right where they need to be with plenty of bone and a huge foot. Since she calved late this spring, we flushed her once and got 13 transferable embryos. In last year's Millennium Sale both of her heifers topped the bred heifer division. I am confident in saying both of her open heifer calves and her bull calf will be favorites here on October 3rd. We had great expectations for the future for this young donor here at Triple C and feel that No Doubt will be a household

name before she is done producing. **Sells open and ready to flush.**

Intence and Kudos are full sisters sired by the National Champion Bull, JS Burning Up, and out of our No Doubt donor cow. This mating really clicks. The open heifer and bull mates to these two may both be the best in their groups and these two breds could be as well. They all possess the extra extension and length that make them attractive. Intence is

not broke to lead, but certainly should be. For a May yearling being wintered with older heifers, she certainly combines a lot of goodness. Kudos is a little thicker and has that same "show me" look.

Lucky Jewel is a littermate to Majic Man.

She out-produces herself every year and has had two bulls in our Denver pens that went on to be Bullennium Sale highlights. Her heifer calf this year is simply stunning. Check out Lucky Jewel's genetic values. They are as unique as I've seen. Her MWW, Milk, YG and REA are all off the charts with most of her other traits being in the top 15%. Lucky Jewel is certainly a breeding piece or donor for some progressive breeder.

## 2- #1 Frozen Embryos - Fraulein x Red Caesar

# Grace N10 Cow Family

Grace is a young cow that simply earned her way into our donor pen. Her first natural calf was our Millennium sale highlight, Triple C Miss Wisconsin, purchased by Marc Tincher (OH). Her Majic Man heifers this year are truly the right kind. Her Ultimate Force pregnancies will certainly be ones to watch. Grace is a fault free, soft middled, sweet fronted and sound cow that is homozygous polled and homozygous black. She flushes extremely well, averaging 22.5 good eggs per flush. She sells bred for a late January calf to our exciting Jade son, Dreamworks.

Triple C Magical Moment W04G

Black Dbl. Polled PB Bull ASA#2487961

Tattoo: W04G BD: 3-12-09 Adj. BW: 91 ET Adj. WW: 960

Magical Moment had one the day we weaned him when his adjusted 205 weight figured out to be 960 lbs. It is sure nice to see our weaning weights, as a whole, back up so we can still say we are the performance breed. This dude will add length of body and style as well.

Black Dbl. Polled PB Female ASA#2487960 Tattoo: W011R BD: 3-11-09 Adj. BW: 89 ET Adj. WW: 719

We have sold many of these Lacey daughters and this one may be the best yet. She is thick made down her top and square in her rump. She is stylish fronted and deep throughout. We didn't take as many pictures of these younger heifers who were still nursing the cow, but I wish we would have snapped this one.

## Harmony

Harmony is a beautiful baldy first calf heifer that topped the open heifer division in the 2008 Denver Sale. We purchased her with Rolling Hills Farm (AR) and the following year she won her division at the AJSA North Central Regionals and was Third Overall Heifer. She went on to be Tenth Overall Heifer at the AJSA Classic for Kade and later was Grand Champion Heifer at the Wisconsin State Fair Junior Show (not shown in open class) as well as the Arkansas State Fair open show and numerous other shows. Harmony is a full sister to WAGR Dream Catcher. If you need a young baldy heifer that will add depth of body and eye appeal, be sure to check Harmony out sale day. **Sells open and ready to flush.**

These two stylish heifers are a little old school, but they are expressive muscled and big topped. They have feminine fronts and are high performing. Their dam, Spice It Up, was the Reserve Supreme Champion at the 2001 Canadian Agribition. They have the genetics and ability to win, all you have to do is feed them.

We purchased Beauty's Right from Jerry Walsh last year with intentions of adding her to our Donor line up next year. To this point, she continues to impress us with her completeness. From genetic values to phenotype, she balances nicely. She is long structured, clean fronted and plenty thick. She is level topped and square hipped. We chose to A.I. her to Taylor, our Bullenium Sale topper that sold to Allens 5x Farms (IL).

Not all cows are lucky enough to produce a National Champion like No Joke. One of her Raymond daughters, FC NO Wonder, was Grand Champion at the AJSA National Classic for Mitch Tarr (IL). Another daughter topped our Millennium Sale, purchased by Valerie Mankey (PA) and is a lead donor for them. Yet another daughter is at Hudson Pines Farms and her first natural calf is one of our lead donors, No Doubt. This cow simply has the ability to produce good ones. She sells with her newborn calf sired by Raymond.

This deep middled, sound structured cow came from our buddies at Brant Farms, where Jon Henry says her cow family is the best they have. She is a fault-free, easy fleshing cow that simply gets it done year after year.

Touch Me Not is a full sister to Spice Girl that won Denver for Michael Rolfes. This black baldy female's calf last year was our High-Selling Open in our Millennium sale, selling to the Tunstills (AR). Her baldy heifer this year, by Power Plus, is simply massive. Buy her for a donor or front pasture cow.

Dazzle has an outcross pedigree that we were developing here at TCF. Her grandmother, the Sweetheart cow, was one of the breed greats. Her grand sire, Siegfried, was the most balanced in his genetic values we could find. We mated her to possibly the soundest Simmental bull to date, Made Black, and produced Dazzle. From there, she has done a tremendous job. Look her up sale day.

This young Reymond cows possesses all the good traits needed to service the beef business. She is super sound, easy fleshing, perfect uddered, moderate framed and rebreeds early every year. She sells bred to Taylor, one of the Shear Force x Josie sons that is doing so well for Mitch Allen (IL). I would recommend this cow to anyone.

## Triple C Smarty WR17

**Black Dbl. Polled PB Bull** ASA#2487911 Tattoo: WR17 BD: 2-24-09 Sire: Triple C Singletary S3H

RC25N was purchased from

Jerry Richter last year. We brought her home, and she laid down and had twin In Dew Time heifers. She bred back to Dreamworks. These Power Drive cows just simply work. They are easy fleshing, fertile and sound cows with consistently nice shaped udders. This one possesses a bonus by having Rewards Queen as her mother.

Sweet N Dacey is a larger framed Lucky Dice cow that traces back to one of the better cow families to leave Triple C. She has the ability to pass on the high performance trait to her offspring as her growth EPDs indicate. She is a problem-free, low maintenance cow that simply weans heavy calves.

When you talk about profitability and longevity, I think of this mating. These girls are sisters to many that have done it all from winning shows to topping sales to producing offspring that do the same. They are loose structured, big

middled, pretty fronted heifers that are desstined to make awesome cows. A full sister, Cheery, won the most scholarship money yet in the Triple C program for Charlie Myerscough (IL).

Ultimate Baby is a littermate to our high-selling open percentage heifer in last year's Millennium Sale to Sanders Ranch (KS). This heifer is cool fronted and big middled. She is really agile and very attractive. We chose to A.I. her to 2411. As good as he worked on 7144, we could only imagine how it would work with a shot of Shear Force and Queen.

LAZY H BAR FOREVER LADY 5001  
V A R FOREVER LADY 4304

Forever Lady 7190 is one awesome female and is woned with Salton Angus (IA). She is massive in terms of muscle and volume. Add this to her attractive, long, sleek front combined with her bone and big foot makes her eextremely impressive. When viewing her from a genetic standpoint, her pedigree is quite unique. She is a Raven x Midland x V&R Forever Lady 4304 (one of Express Ranch's leading donors). We flushed Lady once and got nine transferable embryos. It's a shame we didn't have time to see the Salton, Triple C partnership work longer, but only in a dispersal would get the opportunity to purchase genetics of this caliber.

When Will Salton called us and wanted us to partner on four Lazy H Bar Forever Lady 5001 daughters, we never dreamed that they would be this powerful. 8143 is the definition of maternal. She is massive ribbed, feminine fronted and

super sound. The excitement 8143 and 7190 created at the recent Wisconsin State Fair was overwhelming – where one won her division and the other was reserve in hers. 8143 sells bred to Limestone Darkhorse, the most talked about young Angus bull in Denver. The future of this great Angus female is unlimited. She sells in her entirety.

Dutchess is an Angus cow that goes back to the Leachman 3063 donor we had here at Triple C at the beginning. Dutchess is extended in her front end and milks well. She raised twin bull calves this year and did a fine job.

These two In Dew Time twin bulls certainly bring a lot to the table. They are long spined, deep middled, free moving youngsters that have a lot of eye appeal. If you run enough cows that you need two bulls to turn out, why not use these two full brothers.

# Triple C Herd Bulls

## The Power Drive Clones

TCF Power Drive R2412

TCF Power Drive R2411

TCF Power Drive R2417

What a great adventure these clones have been! From the day Peter called me and said that Glen Woodrow was on his way to deliver them until right now, we have sure been excited about them. The most asked question is: which one is better? I cannot answer that because they all do a good job. 2411 and 2412 have been used at the Wisconsin Ranch extensively servicing cows naturally, while 2417 has been doing the same for the Kansas Ranch. They are all massive bulls with plenty of muscle and guts. They are big boned and large footed. They are homozygous black and heterozygous polled. R2411 was the only one we ever collected semen on, and his large bank will also sell. Along with our other older bulls on sale day, they will be housed at our other farm 1/4 mile West of the Sale Site and will not go through the ring. They are all gentle enough, but we are trying to prevent problems and they can be loaded more easily from the other site. The impact Power Drive 88H has on our breed is tremendous. Look at how many of the great Simmental females and bulls who go back to 88H. These clones haven't been used as much, but they seem to do equally as good. If you need a big time herd sire to sell semen or service cows, any of these will work. **Selling 100% interest and full possession of all three!**

# Triple C Herd Bulls

## Triple C El Poderoso Rey L8379 "Reymond"

Reymond, at eight years old, still services more cows naturally than any other bull here. He simply gets the job done. He is a genetic giant. Check out his values and accuracies. His calving ease and birth weights are in the top 5% of all bulls. His weaning weight value is above the top 10% and yearling weight and stayability in the top 1% along with both his API and TI being above 99% of all the Simmental bulls in the system. He posts these impressive numbers with high accuracies. This homozygous black trait leader has a limited amount of semen left, all of which sells as Lots #284 - 284D. I do not know how many years he has left, but just the value of one calf crop is tremendous.

*General is a bull I would recommend to anyone. Steve bought him from Grammas a few years ago to add an outcross pedigree to our program. Honestly, we didn't give him a fair chance. He followed in the footsteps of Reymond, Ameritrade, the clones and Invasion, so he simply didn't get our better cows. Last year, after covering a set of cows for us, he went on and covered another set for Clark Anderson. I would recommend this homozygous black and homozygous polled bull to anyone. He is super sound and thick throughout.*

TRIPLE C INVASION R47K  
HOOKS KARRIE 47K  
BCS ACES HIGH J107  
GRACE N10  
B&B JASMINE

Grady is a loose hided, free structured bull that is big boned and large footed. This homozygous polled and homozygous black youngster is Grace's natural calf from last fall. His genetic values are really balanced from calving ease to growth to carcass values. If you need a bull for fall calving cows or a larger group of spring calving cows, this gentle guy will get it done.

## Triple C Beyond Reach W48R

**Black Dbl. Polled PB Bull** ASA#2487910 Tattoo: W48R BD: 2-20-09 Adj. BW: 92 Adj. WW: 783

HOOKS SHEAR FORCE 38K  
TRIPLE C L. TAYLOR  
LUCAS JOSIE 19K  
ES DAKOTA NK68  
HSF JOSIE L28 R48  
HSF JOSIE 755G L28

*These L. Taylor bulls calves are the main reason we used him so hard again this year. They are thick through out and have plenty of length. They are moderate framed with plenty of eye appeal and above average performance. Beyond Reach is simply "all that".*

# Thank You for Attending the Complete and Total Dispersal Sale of Triple C Farms

Genetic Opportunity of a Lifetime - The Complete Dispersal of Triple C Farms

# Thanks to our Loyal Customers and Friends Throughout the Years

Genetic Opportunity of a Lifetime - The Complete Disposal of Triple C Farms

# Triple C Farms Golden Book Award

The list of American recipients of the exclusive World Simmental-Fleckvieh Federation Golden Book Award will increase by three when the Class of 2009 is recognized. The new inductees will be honored during the American Simmental Association's 41st Annual Meeting and Convention, January 31, in Fort Worth, Texas.

"We want to congratulate Sally Buxkemper, Nichols Farms and Triple C Farms on their selection," said ASA Board Chairman Mike Stoltey, Plummer, Idaho. "All have been major contributors to our breeds and to this organization."

## Triple C Farms, Maple Plain, Minnesota

Peter Courtney, owner of Triple C Farms, is widely acknowledged for his advocacy and support of the American Junior Simmental Association on local, state, regional and national levels. Over the years, he has not only donated financial resources and genetics to support the youth program, but he has been the driving force behind putting the ASA Foundation on a solid footing. He has served continuously as a member of the Foundation Board since 1995,

Triple C was among the earliest of Simmental operations to establish an innovative scholarship program that has gained universal praise and recognition.

With his wife, Ila, Courtney maintains a breeding herd of more than 400 Simmental cows at three separate locations: Maple Plain, where he resides; Emerald, Wisconsin, and at Ramona, Kansas. The Courtneys have conducted female production sales for the past 13 years and bulls sales for eight years. Triple C Simmental genetics are highly regarded and in great demand by seedstock producers from coast-to-coast.

Described as "an agricultural activist", Courtney chooses to live in a rural, country setting, breeding Simmental cattle, although he owns and operates a thriving corporate business headquartered in the Minneapolis-St. Paul metro area.

Triple C Farms has been extremely progressive, consistently participating in ASA programs—including Total Herd Enrollment; Carcass Evaluation programs; Ultrasound Date Reporting and others.

Realizing the value of promotion and advertising, Triple C Farms has advertised in *the Register* and *SimTalk* continuously for many years.

Reprinted with permission from the December 2008/January 2009 *the Register*.  
Author, Dan Rieder
